

ODUWOLE EYINOJUOLUWA TAOFEEK

Lagos, Nigeria | oduwoleeyinojuoluwa44@gmail.com

SUMMARY

Backend Engineer specialising in designing and building scalable systems, APIs, and microservices. Proficient in Node.js, JavaScript, and MySQL, with a strong focus on system architecture, security, and performance optimisation.

Experienced in developing production-grade systems including payment processing, logistics tracking, and distributed job queues. Built open-source tools such as a deterministic code analysis engine and a CLI input correction system.

Demonstrated impact through backend systems handling high-volume operations (50K+ daily events) and measurable performance improvements. Focused on building reliable, secure, and scalable backend infrastructure.

EXPERIENCE

US Express Drop (Logistics Platform) | Backend Developer

- Architected backend systems supporting 50K+ daily shipment events
- Built real-time tracking API with <200ms latency
- Developed payment processing system aligned with PCI standards
- Implemented distributed job queue for high-volume operations
- Reduced support tickets by 40% through audit trail systems

Manifesti | Support Backend Developer (Code Audits)

- Conducted deep code audits across 50+ API endpoints
- Eliminated N+1 query issues, reducing database load by 65%
- Improved authentication and logging systems for stronger security
- Standardised error handling across services

Deen AI | On-Call Backend Engineer

Remote | 2025 – Present

- Maintain backend services handling real-time API traffic
- Implemented Workload Identity Federation (WIF) for secure authentication
- Designed and maintained microservices communication
- Ensured high system uptime through monitoring and incident resolution

HNG Internship — HNG13 | Backend Team Lead (Finalist)

Remote | 2025

- Led backend development for Deen AI microservices platform
- Built wallet system for transaction processing and balance tracking
- Mentored developers while contributing to system architecture

KPMG | Cyber Security Analyst

Lagos, Nigeria | Mar 2024 – Nov 2024

- Conducted resilience assessments achieving 95% readiness
- Identified and mitigated 20+ critical risks (~30% reduction)
- Developed ISO 22301 disaster recovery plan reducing downtime by 50%

KPMG | Backend Web Developer (Client Project)

Lagos, Nigeria | Mar 2023 – Nov 2023

- Built backend systems supporting 1K+ user interactions weekly
- Designed 15+ KYC APIs, improving processing speed by 30%
- Reduced onboarding time by 26% through improved documentation

CodeAlpha | Software Developer

Remote | Mar 2024 – May 2024

- Built network sniffing tool for real-time traffic monitoring
- Developed automation scripts for log analysis across large datasets

HNG Bootcamp | *Backend Developer*

Remote | *Aug 2023 – Nov 2023*

- Built REST APIs for multi-user applications
- Developed scalable backend systems using Node.js and MySQL

EDUCATION

Crescent University | *B.Sc. Computer Science — Second Class Upper*

- Thesis: Risk Strategy Framework for ISMS (Simulated Study)

PROJECTS

CodeRoast — Deterministic Code Analysis Engine

- Built structured pipeline combining static analysis with constrained AI
- Prevents hallucinated insights through validation layers
- Processes repositories with 1,000+ files efficiently

FuzzRun — CLI Input Correction Tool

- Developed intelligent CLI tool for detecting and correcting invalid commands
- Reduces execution errors and improves developer workflow efficiency

AI Community Finance Platform — Hackathon Project

- Built during Enyata Hackathon (Top 10 / 5,000+ participants)
- Designed backend for group contributions and expense tracking
- Enabled transparent financial activity across users

SKILLS & INTERESTS

Programming Languages: TypeScript, JavaScript, Python

Frameworks: Express.js, Flask, FastAPI, React (Next.js)

Databases & BaaS: MySQL, Firebase, Supabase, Convex, Sanity

State Management: Zustand, RTK

Version Control: Git & GitHub

Soft Skills: Problem solving, collaboration, communication

CERTIFICATIONS & CONTINUING EDUCATION

- ISO 27001 Lead Implementer – Mastermind Assurance (2025)
- AWS Cloud Practitioner – AWS (2024)
- Fundamentals of Cybersecurity – ISC2 (2024)
- Python for Data Science – Coursera (2023)
- HNG Backend Developer (2023 & 2025)
